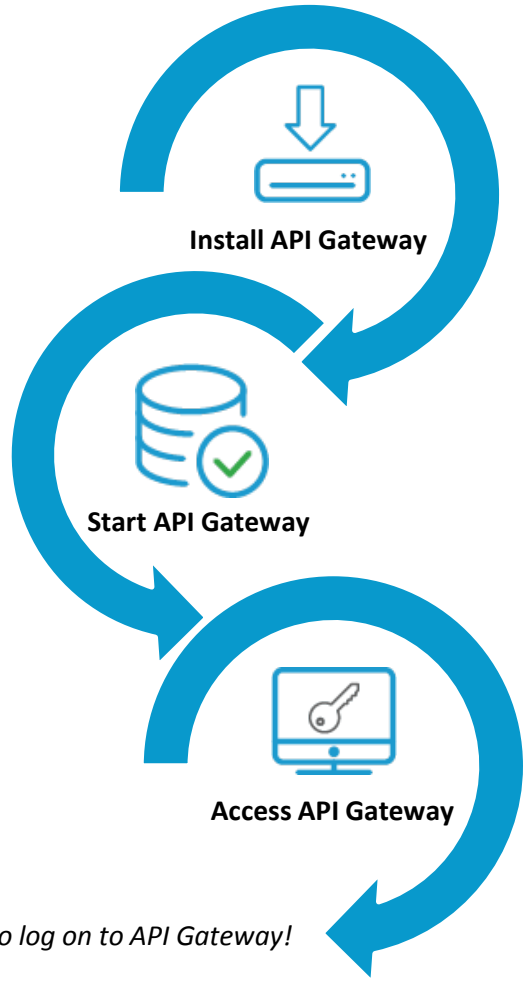
API GATEWAY QUICK START



Install API Gateway using Software AG Installer:

- Change installation directory, select API Gateway, and provide license file
- Select default ports for IS, API Gateway, and Event Data Store
- Select embedded database

For more information, see *Installing Software AG Products.*

Start API Gateway either by:

- Running `C:\APIGateway\Integration Server\instances\default\bin\startup.bat`

  Or,
- Opening from the Start menu

For more information, see *Integration Server Administrator's Guide.*

Access API Gateway UI in one of these ways:

- Navigate to `http://host:port`, where port is the HTTP port of API Gateway configured during installation; the default port being 9072

You are all set to log on to API Gateway!
