Data Archiving for Adabas Installation

Data Archiving for Adabas is a fully portable technology. It runs in all primary Unix systems, Windows and also in z/OS. There is only one code-base rather than one code-base for open systems and another for mainframe.

Important:
Software AG strongly recommends that you read the installation very carefully. Also, there are often things that are mentioned in the Readme of the product that have come to light after this documentation is frozen so please also be sure to read that before proceeding with the installation actions.
