ICONLIST ICONLIST

## **ICONLIST**

The ICONLIST is very similar to the BUTTONLIST, representing a list of items instead of a list of buttons. The list can either be a vertical list or a horizontal list.

The following topics are covered below:

- Adapter Interface
- Built-in Events
- Properties

## **Adapter Interface**

DEFINE DATA PARAMETER

1 ICONLIST (1:\*)

2 DRAGINFO (U) DYNAMIC

2 DROPINFO (U) DYNAMIC

2 ID (U) DYNAMIC

2 IMAGEURL (U) DYNAMIC

2 METHOD (U) DYNAMIC

2 NAME (U) DYNAMIC

2 TEXT (U) DYNAMIC

END-DEFINE

## **Built-in Events**

value-of-iconlistprop.onDrop value-of-iconlistprop.onSelect

## **Properties**

| Basic        |   |            |       |
|--------------|---|------------|-------|
| iconlistprop | Name of the adapter parameter that represents the control in the application.   | Obligatory |       |
| vertical     | Direction of the icon list.   | Optional   | true  |
|              | If not specified (or set to "true") then the icons are arranged in one column, one below the other. If specified as "false" then the icons are arrange in one row, one aside the other. |            | false |

ICONLIST Properties

| cellspacing | An icons of the ICONLIST control is  | Optional | 1                            |
|-------------|--|----------|------------------------------|
|             | embedded into an internal cell. The CELLSPACING property defined the number of pixels that are kept between the icon on the  |          | 2                            |
|             | of pixels that are kept between the icon an the border of this cell.   |          | 3                            |
|             | Use the CELLSPACING in order to define a certain distance each icon keeps from the next item.  |          | int-value                    |
| comment     | Comment without any effect on rendering and behaviour. The comment is shown in the layout editor's tree view.  | Optional |                              |
| Appearance  |  |          |                              |
| imagewidth  | Pixel width of the image that is shown inside the icon. If not defined then the icon is rendered with its normal width.  | Optional |                              |
| imageheight | Pixel height of the image that is shown inside<br>the icon. If not defined then the icon is rendered<br>with its normal height.  | Optional |                              |
| align       | Horizontal alignment of control in its column.   | Optional | left                         |
|             | Each control is "packaged" into a column. The column itself is part of a row (e.g. ITR or TR).   |          | center                       |
|             | Sometimes the size of the column is bigger than the size of the control itself. In this case the "align" property specifies the position of the control inside the column. In most cases you do not require the align control to be explicitly defined because the size of the column around the controls exactly is sized in the same way as the contained control. |          | right                        |
|             | If you want to directly control the alignment of text: in most text based controls there is an explicit property "textalign" in which you align the control's contained text.  |          |                              |
| tablestyle  | Style definition (following CSS style sheet definitions) that is used for the background area of the ICONLIST control.   | Optional | background-color:<br>#FF0000 |
|             |  |          | color: #0000FF               |
|             |  |          | font-weight: bold            |
| cellstyle   | Style definition (following CSS style sheet definitions) that is used for each cell area of the ICONLIST control in which an icon is kept.   | Optional | background-color:<br>#FF0000 |
|             |  |          | color: #0000FF               |
|             |  |          | font-weight: bold            |

Properties ICONLIST

| displaymenuindicator   | If set to true a small indicator signals that there is a corresponding menu 'behind this icon'. Default is false.  | Optional | true<br>false         |
|------------------------|--|----------|-----------------------|
| additionaltextposition | Position of the text that is displayed inside the control. Use method ICONLISTItem.setName to set the text.  | Optional | aside<br>below        |
| textsize               | The HTML font size of the text. Corresponding to the HTML definition "1" means "smallest" and "6" means "biggest".   | Optional | 1<br>2<br>3<br>4<br>5 |
| withrightpadding       | Flag (boolean) that indicates whether to insert a padding right hand of the last icon. This attribute does apply for horizontal ICONLIST only (see attribute VERTICAL). Default is true. | Optional | true                  |
