

# ULANG - User Language

This Natural profile parameter specifies the language to be used for date edit masks, system messages, user messages, helptexts, help routines, and multi-lingual maps. The setting is used to set the Natural system variable \*LANGUAGE.

**Note:**

See also the note on language code related adaptation of profile parameter CP when set to ON.

<b>Possible settings</b>	1 - 60	Language code.  For example, 1 is assigned to English, 2 is assigned to German, 3 is assigned to French.  For a detailed list of language codes, see the table in the documentation of the *LANGUAGE variable.
<b>Default setting</b>	1	
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no	
<b>Application Programming Interface</b>	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.

Within the session, the language code can be specified using the terminal command %L=.
