

# HI - Help Character

This Natural profile parameter defines the character which is to be used to invoke a field-specific helproutine or a map helproutine (if defined for a given map).

<b>Possible settings</b>	any special character	The character which is to be used to invoke a field-specific helproutine or a map helproutine.  The character specified with the profile parameter HI must not be the same as the one specified with the profile/session parameter CF (control character for mainframe terminal commands); it should not be the same as the one specified with the profile/session parameter DC (decimal character), profile/session parameter IA (input assign character) or profile/session parameter ID (input delimiter character).
	blank	When HI = ' ' is set, a help key must be defined in the Natural application, using the SETKEY statement correspondingly; otherwise it is not possible to invoke a helproutine for any field.
<b>Default setting</b>	?	Question mark.
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no	
<b>Application Programming Interface</b>	USR0350N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.
