

MS - Manual Skip

With this session parameter, you control the cursor positioning during the processing of an INPUT statement.

Possible settings	ON	See example below. Note: The setting MS=ON is not supported under BS2000/OSD.	
	OFF	The cursor will be positioned to the next input field as soon as the value for the current field is entered with all positions.	
Default setting	OFF		
Specification within session	yes	Applicable Statements:	FORMAT INPUT
		Applicable Command:	none

Example:

```
INPUT (MS=ON) #A #B
```
