

WORK - Work-File Assignments

This Natural profile parameter defines the number of work files to be used during the session.

Possible settings	0 - 32	Number of work files.
Default setting	32	
Dynamic specification	no	
Specification within session	no	

WORK=*nn*

If WORK is set to *nn* (in the range 1 - 32), this setting defines the highest work file number which is available for the Natural session.

See also *Work Files* in the *Operations* documentation.
