

# OPTIONS

`OPTIONS parameter ...`

This chapter covers the following topics:

- Function
- 

## Function

The `OPTIONS` statement can be used to specify compilation options as parameters for the current Natural programming object. These are the same options that can be specified within a Natural session with the `COMPOPT` system command.

**Note:**

No mainframe-specific options are available. For compatibility reasons, for example, when programming a cross-platform application, such options are ignored during compile time.
