Change the Default Window Settings

▶ **To change the default window settings for your generated module:**

1. Press PF5 (windw).

   The Window Parameters window is displayed. For example:

   ```
   CU--DWM            Natural Construct           CU--DWM0
   Oct 21             Window Parameters             1 of 1

              Size ........  Height ....... ___
                             Width ........ ___

              Position .....  Line ......... ___
                             Column ....... ___

              Frame OFF .... _
   Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---
         help  retrn quit  test
   ```

2. Use the following fields to build the DEFINE WINDOW statement:

Field	Description
Size	• Height Number of lines the window spans. • Width Number of columns the window spans.
Position	• Line Number of lines from the top of the panel to the top of the window. • Column Number of columns from the left side of the panel to the left side of the window. The line and column values form the top left corner of the window.
Frame OFF	If this field is marked, the window is displayed without a border (frame).

3. Press Enter to confirm the changes.

Test the Modified Window Settings

You can view a test version of the window with the characteristics specified in the Window Parameters window.

▶ **To test the modified window settings:**

- Press PF4 (test) in the Window Parameters window.
