For information about the webMethods SAP Process Monitoring Agent and webMethods SAP Adapter, which are components of webMethods Optimize for SAP, see the webMethods Adapter System Requirements.

For webMethods Insight platform support please see the webMethods Insight 8.2 release notes

*¹ Includes the Base Server and Advanced Platform.

*² EntireX, ApplinX and Tamino support additional operating systems. See the Release Notes of these products.

*³ Only 32-Bit product version supported

*⁴ Windows Desktop platforms are supported for webMethods server functionality for development environments only

*⁵ Only supported on Windows Server 2008 R1

*⁶ Broker C client library supported for both 32-bit and 64-bit Solaris on 64 UltraSPARC

*⁷ For further details please check the IBM Cognos support matrix

<https://www-304.ibm.com/support/docview.wss?uid=swg27019126>

*⁸ Please contact your Software AG representative if you plan to install on a Solaris CMT system

Language packs are available for webMethods products on all supported operating systems except Mac OS X.

The document will be updated whenever support for additional operating systems, e. g. i5/OS or Linux on IBM System z, is available

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.

Except where otherwise specified by a special arrangement, we support our software operation only on the supported Linux distributions mentioned above. Customers may run webMethods software on Linux distributions like Oracle Linux and other Linux distributions that are stated to be compatible with the Linux distributions supported by webMethods products. If they encounter an issue that might be related to webMethods software, Technical Services may ask the customer to reproduce the issue on the Red Hat or SUSE distributions that are supported before analyzing the issue further.

^{*1} Windows Desktop platforms are supported for webMethods server functionality for development environments only

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.

Supported RDBMSs

webMethods products support their database components on all platforms on which the RDBMS vendor supports the RDBMS. All webMethods products come with the client component of the DataDirect Connect JDBC 4.2 driver. This driver is a Type 4 JDBC driver that does not have a server component. For information about the database components and the webMethods products that use them, see "*Installing webMethods Products*".

		Oracle ^{*1}	DB2	SQL Server
		11 g (R1 / R2)	9.7 LUW	2005 / 2008

The JDKs listed above are part of the webMethods 8.2 delivery.

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.

Supported Browsers

webMethods products require one of these Web browsers:

Microsoft Internet Explorer 7.x, 8.x

Mozilla Firefox 3.x

Unless otherwise specified in our documentation, we encourage installing the latest service packs, patch-bundles and fixes for the supported operating systems and products if those are recommended by the respective vendor. Please report defects resulting from 3rd party supplied fixes, patches or service packs to the vendor directly.

Software AG tests its software against specific versions of operating systems and supported products (RDBMSs, JDKs, browsers, application servers, directory servers) and not specifically against all possible combinations of patches, fixes and hardware that might comprise that platform. Therefore, Software AG may not use the exact same versions of fixes, patches or service packs for operating systems and supported software products, when troubleshooting a customer issue.

Supported Directory Servers

These LDAP v3 compliant Directory Servers are supported.

		IBM Tivoli Directory Server 6	Microsoft Active Directory Domain Services	Novell eDirectory 8	OpenLDAP 2	Sun Java System Directory Server Enterprise Edition 6/7	Oracle Internet Directory 11g	Apache Directory Server 1.5
CentraSite	8.2	✓	✓	✓	✓	✓		✓
