Document Conventions

Convention	Description
Bold	Identifies elements on a screen.
Monospace font	Identifies service names and locations in the format <i>folder.subfolder.service</i> , APIs, Java classes, methods, properties.
<i>Italic</i>	Identifies: Variables for which you must supply values specific to your own situation or environment. New terms the first time they occur in the text. References to other documentation sources.
Monospace font	Identifies: Text you must type in. Messages displayed by the system. Program code.
{ }	Indicates a set of choices from which you must choose one. Type only the information inside the curly braces. Do not type the { } symbols.
	Separates two mutually exclusive choices in a syntax line. Type one of these choices. Do not type the symbol.
[]	Indicates one or more options. Type only the information inside the square brackets. Do not type the [] symbols.
...	Indicates that you can type multiple options of the same type. Type only the information. Do not type the ellipsis (...).

Online Information and Support

Software AG Documentation Website

You can find documentation on the Software AG Documentation website at <https://documentation.softwareag.com>.

Software AG Empower Product Support Website

If you do not yet have an account for Empower, send an email to empower@softwareag.com with your name, company, and company email address and request an account.

Once you have an account, you can open Support Incidents online via the eService section of Empower at <https://empower.softwareag.com/>.

You can find product information on the Software AG Empower Product Support website at <https://empower.softwareag.com>.

To submit feature/enhancement requests, get information about product availability, and download products, go to [Products](#).

To get information about fixes and to read early warnings, technical papers, and knowledge base articles, go to the [Knowledge Center](#).

If you have any questions, you can find a local or toll-free number for your country in our Global Support Contact Directory at https://empower.softwareag.com/public_directory.aspx and give us a call.

Software AG Tech Community

You can find documentation and other technical information on the Software AG Tech Community website at <https://techcommunity.softwareag.com>. You can:

- Access product documentation, if you have Tech Community credentials. If you do not, you will need to register and specify "Documentation" as an area of interest.
- Access articles, code samples, demos, and tutorials.
- Use the online discussion forums, moderated by Software AG professionals, to ask questions, discuss best practices, and learn how other customers are using Software AG technology.
- Link to external websites that discuss open standards and web technology.

Data Protection

Software AG products provide functionality with respect to processing of personal data according to the EU General Data Protection Regulation (GDPR). Where applicable, appropriate steps are documented in the respective administration documentation.

2 Upgrading from Earlier Versions

■ General Upgrade Information	6
-------------------------------------	---

This section provides an overview of upgrading Adabas SAF Security and is applicable to the upgrading of version 8.2 SP2 and above.

General Upgrade Information

- [License File](#)
- [Adabas Limited Library \(WAL\) and the SAF Modules](#)
- [Adabas System Coordinator](#)
- [Online Services \(SYSAAF\)](#)
- [Adabas SAF Security Maintenance](#)

License File

Starting with Adabas SAF Security 8.3.1, you must install a valid license file on all mainframe platforms in which Adabas SAF Security is installed. For information regarding license requirements, refer to the section *License*.

Adabas Limited Library (WAL) and the SAF Modules

Adabas SAF Security 8.3.1 is fully compatible with all supported releases of the Adabas Limited Library (WAL).

This compatibility means that Adabas SAF Security 8.3.1 can continue to be used with your current SAF security kernel and associated site-assembled modules; SAFCFG (configuration), SAFPMAC (operating system services) and SAFSEC (RACROUTE macros).

Please note specific features of Adabas SAF Security may require a certain minimum level of WAL library. The relevant feature description will indicate whenever this is the case.

Adabas System Coordinator

It is strongly recommended that the mostly recently available version of Adabas System Coordinator is used with Adabas SAF Security. If your version of Adabas System Coordinator requires upgrading, please refer to the *Upgrading from Earlier Versions* section of the *Adabas System Coordinator* documentation before you start.

Online Services (SYSAAF)

The new version of the Adabas SAF Security online services can be used to administer and monitor both new and current versions. Of course, any newly implemented configuration and monitoring capability will only take effect when the appropriate new version component is running.

Likewise, your current version of the Adabas SAF Security online services can be used to administer and monitor both new and current versions. Of course, when using your current version, administration of any newly implemented configuration and monitoring capability will not be possible.

Adabas SAF Security Maintenance

Refer to Software AG's [Empower](#) website for the latest available maintenance for the new version of Adabas SAF Security.

If maintenance is available, we strongly recommend it is applied before proceeding with the upgrade.
