

List Checkpoints

Selecting *Checkpoint maintenance* (option C) from the Main Menu invokes the Checkpoint Maintenance menu:

```

14:41:59          ***** A D A B A S  BASIC  SERVICES *****          2002-05-29
                  -  Checkpoint Maintenance  -                          PCP0002

                                Code      Service
                                -----
                                C         List checkpoints
                                *         Delete checkpoints
                                ?         Help
                                .         Exit
                                -----

Code ..... _
Date(YYYY-MM-DD) . 0000-00-00
Ext. CP-list ..... N
Checkpoint Name .. ALL
Database ID ..... 1955   (WIS1955)

Command ==>
PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8----- PF12-----
Help              Exit              Menu

```

Option C lists checkpoints currently in the checkpoint file.

The result can be either a basic or an extended list, depending on the setting of the "External CP-list" field, which can be used to override the CPEXLIST operating control parameter.

You can start the list of checkpoints on a particular day by entering the date in the Date field in exactly the format shown.

You can specify the database for which the checkpoint list is to be written.

You can restrict the list to a particular type of checkpoint by changing the ALL designation in the Checkpoint Type field to one of the following:

SYNC	nucleus initialization
SYNF	user open EXF
SYNP	utility without NUC
SYNS	ADARES
SYNV	volume ID change
SYNX	utility
SYN1	ADASAV DB begin
SYN2	ADASAV DB begin
SYN4	ADASAV file begin
SYN5	ADASAV file begin

For more information about checkpoint types, see ADAREP in the Adabas Utilities documentation .

The following screen displays a normal checkpoint list:

```

15:12:22          ***** A D A B A S Basic Services *****      1997-01-30
DBID 105          - List Checkpoints -                               PCPC002

  CP  CP      Date      Time      PLOG      Block      Vol/Ser      User Job Name
  Name Type                                     Number      Number      Number      Type
