

AOSLOG : Log Active Nucleus Update Commands

Parameter	Specify . . .	Possible Values	Default
<u>AOSLOG</u>	whether to log update commands from ADADBS OPERCOM or AOS that modify the active nucleus	YES NO	NO

Value	Meaning
YES	Log to DDPRINT Adabas calls that modify the active nucleus (not read/display calls) issued by ADADBS OPERCOM or the equivalent Adabas Online System (AOS) functions.
NO	The default setting. Commands are not logged.

Example:

```
ADARUN PROG=ADANUC,AOSLOG=YES
```
