

MSGCONSL : Case of Messages Sent to the Console

MSGDRUCK : Case of Messages Sent to DD/DRUCK

MSGPRINT : Case of Messages Sent to DD/PRINT

Parameter	Specify the case of Adabas . . .	Possible Values	Default
<u>MSGCONSL</u>	messages sent to the console	<u>U</u> PPER <u>M</u> IXED	<u>M</u> IXED
<u>MSGDRUCK</u>	messages sent to the DD/DRUCK dataset		
<u>MSGPRINT</u>	messages sent to the DD/PRINT dataset		

Adabas messages are displayed in mixed upper and lowercase. You can use one or more of these ADARUN parameters to display different message types in all uppercase.

Note:

The first message line in DDPRINT will not be influenced by the value of parameter MSGPRINT.

Example:

Display messages in the DDDRUCK and DDPRINT datasets in all uppercase:

```
ADARUN MSGDRUCK=U,MSGPRINT=U
```
