

TAPEREL : Tape Handling Control (BS2000 Only)

Parameter	Specify . . .	Possible Values	Default
TAPEREL	end-of-file (EOF) handling for tapes and cartridges.	KEEPUNL KEEP NO RELEASE UNLOAD	KEEPUNL

Value Meaning

KEEPUNL (default) Retain the I/O unit assignment but unload the tape or cartridge.

KEEP Retain the I/O unit assignment without unloading.

NO Do not perform the RELEASE macro function.

RELEASE Do not keep the I/O unit assignment; do not unload the tape or cartridge.

UNLOAD Do not keep the I/O assignment; unload the tape/cartridge.

Example:

After the ADAULD utility is executed, the I/O assignment remains, and the tape/cartridge remains loaded.

```
ADARUN PROG=ADAULD ,TAP=KEEP
```
