

# VISTA : Adabas Vista Control

Parameter	Specify . . .	Possible Values	Default
<u>V</u> ISTA	whether to enable support for Adabas Vista.	YES   NO	NO

The VISTA parameter enables the nucleus to support Adabas Vista processing. If Adabas Vista is not installed on your system, specifying this parameter invokes the AVILOOK analysis tool delivered with Adabas. For complete information about AVILOOK, read *AVILOOK*.

## Example:

Run Adabas with Adabas Vista.

```
ADARUN PROG=ADANUC,VISTA=YES
```
