

# ASSOPRINT: Print/Dump Associator Blocks

```
ADAICK ASSOPRINT RABN = {ravn | ravn-ravn}  
[NOUSERABEND]
```

This chapter covers the following topics:

- Essential Parameter
  - Optional Parameter
- 

## Essential Parameter

### **RABN: RABNs to be Processed**

The RABN (or a single range of RABNs) to be printed/dumped. If ADAICK can determine the type of information stored in the block (for example. UI, NI,...), it produces a formatted printout.

## Optional Parameter

### **NOUSERABEND: Termination without Abend**

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
