

BATCH: Set Printout Width to 132 Characters Per Line

```
ADAICK BATCH [NOUSERABEND]
```

If ADAICK is to be used in batch mode, this function may be used to set the printout width to 132 characters per line. See the NOBATCH function for information about resetting the printout width.

Optional Parameter

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
