

FDTPRINT: Print/ Dump Field Definition Table

```
ADAICK  FDTPRINT  FILE = file-number  
[NOUSERABEND]
```

The field definition table (FDT) is to be dumped/printed.

This chapter covers the following topics:

- Essential Parameter
 - Optional Parameters
-

Essential Parameter

FILE: File Number

The number of the file for which the FDT is to be printed/dumped. A file number is required the first time you execute ADAICK.

If FILE is omitted on subsequent executions, the last file accessed by ADAICK is used.

Optional Parameters

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
