NOINT: Suppress Interpreted Format

ADAICK   { INT | NOINT } [NOUSERABEND]

This function suppresses the interpreted print format produced, by default, by ADAICK. See the INT function for information about interpreted print format. This function should only be used in conjunction with the ASSOPRINT, DATAPRINT, FCBPRINT, FDTPRINT, GCBPRINT, and PPTPRINT functions.

Optional Parameter

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
