

ADALOD Space/Statistics Report

During LOAD or UPDATE operation, ADALOD prints a report on the message output dataset (DDDRUCK for MVS and VM systems, SYS009 for VSE systems, or SYSOUT for BS2000). The report shows the following information:

- ADALOD function executed (LOAD or UPDATE), and the database/file affected;
- Estimated NI/UI sizes (shown for the LOAD function only if the NI/UISIZE parameters were not specified);
- Available and used file space, by Adabas component (shown for the LOAD function only);
- Current RABNs assigned for the file (shown for the LOAD function only);
- File processing statistics (records processed and system storage used).

Example of the ADALOD LOAD report:

```
PARAMETERS:ADALOD  LOAD FILE...
:
```

```
FUNCTION TO BE EXECUTED:
```

```
LOAD FILE NUMBER      7  (MYOWNFILE)
INTO DATABASE         0013 (MYBESTDB)
```

```
AVAILABLE SPACE:
```

```
(LOAD function only)
```
