Special Online Functions

When the Adabas Delta Save Facility is installed on your system, either the demo or full version of Adabas Online System (AOS) provides access to the optional Delta Save control screens.

***** A D A B A S ONLINE SYSTEM ***** 14:40:40 YYYY-MM-DD - Main Menu -PMAIN02 Code Basic Services Code Other Services -----____ -----1 Cache Services Session monitoring Α Checkpoint maintenance 2 Delta Save Facility С F File maintenance 3 Trigger Maintenance * Database maintenance 4 AOS Security 0 Session opercoms 5 Transaction Manager R Database report 6 Adabas Statistics 7 Space calculation Vista ? Help 8 Fastpath Exit 9 SAF Security -----_____ Code _ Database ... 105 (RD-105) Command ==> PF1----- PF2----- PF3----- PF6----- PF6----- PF8-----PF12-----Help Exit

Note:

The exact sequence of screens and display characteristics (intensified values, etc.) displayed when using AOS depends on the configuration, the features installed on the system, and the current operating status of the system, and therefore may differ from the features and characteristics described in this document.

The remainder of this section describes how to use the Delta Save control screens to install, change, disable, and remove Delta Save logging from the system.

- Logging On to the Adabas Delta Save Facility
- Installing Delta Save Logging
- Enabling Delta Save Logging
- Displaying Current Allocation Information
- Displaying Files Modified by Utilities
- Estimating the Size of a Delta Save Operation
- Disabling Delta Save Logging
- Changing the DLOG Area
- Removing Delta Save Logging

Logging On to the Adabas Delta Save Facility

Select the "Delta Save Facility" option on the Adabas Online System (AOS) Main Menu.

When the Delta Save Facility is active, the Delta Save Facility main menu is displayed.

13:16:45	**** A D A	A B A S BASIC SERVICES *****	YYYY-MM-DD				
Enabled	-	Delta Save Facility -	PDSF002				
	Code	Function					
	А	Allocation/Status of DSF					
	С	Change DSF logging area					
	D	Disable DSF logging					
	E	Enable DSF logging					
	F	Files modified by utilities					
	I	Install DSF logging area					
	R	Remove/Deinstall DSF					
	S	Size Estimate for Delta					
	?	Help

Help	Exit		Menu				

This menu indicates the status of the Delta Save Facility in the upper left corner:

Not installed	The ADARUN DSF=YES parameter is set but the Delta Save Facility is not yet installed.
Enabled	The Delta Save Facility is currently active and functioning normally.
Disabled	Delta Save logging has been deactivated.
Initializing	The Delta Save Facility has been installed but the initialization process has not yet completed. If this status continues, deinstall and then reinstall the product.

Installing Delta Save Logging

If the Delta Save Facility is not yet installed, option I displays the following window:

```
14:55:16
             ***** A D A B A S BASIC SERVICES *****
                                                  YYYY-MM-DD
Not installed
                    - Delta Save Facility -
                                                  PDSF002
            15:16:44 Install DSF
                                          YYYY-MM-DD
         DSF Status .... Not installed
         Specify the values for the following parameters:-
            DLOG Area Size .....
                                   (in Blocks)
                                                    DLOG Area Location ..
                                   (1st RABN) optional |
            Device Type ..... 3380
                                            optional |
        PF1---- PF2---- PF3---- PF4---- PF6---- PF12
        Help
                      Exit
                                            Menu
                                                   _____
Command ==>
PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8-----PF12-----
              Exit
Help
                                                 Menu
```

The DLOG area must be defined before Delta Save can begin operation.

Use the Install DSF screen to define the Delta Save logging (DLOG) area and thereby install Delta Save logging. Enter the DLOG size in blocks, and, optionally, the starting RABN in the Associator and/or the device type to be used for allocation:

- *DLOG Area Size* (required) is the number of Associator blocks to be allocated. The area must be large enough to hold all blocks changed between two consecutive Delta Save operations. About 5 bytes of DLOG area storage are needed for every database write operation. To calculate the size of the DLOG area, see Calculating the DLOG Area Size
- *DLOG Area Location* (optional) is the first RABN to be allocated.
- *Device Type* (optional) is the device type to be used for DLOG area allocation.

When the DLOG area is defined, you are returned to the Delta Save Facility main menu and the message

DSF function Install DSF successfully executed

-is displayed. The status of the Delta Save Facility in the upper left corner of the screen is "disabled". The "disabled" state continues until the next successful full save operation is performed with the ADASAV SAVE utility function.

Enabling Delta Save Logging

If the Delta Save Facility is disabled, option E displays the following window:

```
13:20:36
              ***** A D A B A S BASIC SERVICES *****
                                                       YYYY-MM-DD
Disabled
                      - Delta Save Facility -
                                                       PDSF002
                   -----+
                                                   | DSF is currently disabled and needs to be
                                                   enabled before it can start logging.
                                                   | To enable DSF, a FULL database backup must
             | be run using ADASAV SAVE. Once the FULL
              database save completes, DSF will become
              enabled automatically.
               -----+
                       Exit
                   .
                        _____
                _____
      Code ..... e
      Database ID .. 105 (ADA-MPM105)
Command ==>
PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8-----PF12-----
               Exit
                                                     Menu
Help
```

Once a successful full save operation is performed with the ADASAV SAVE utility function, Delta Save logging is automatically enabled.

Displaying Current Allocation Information

You can use option A to display additional status and allocation information:

```
13:16:45
             ***** A D A B A S BASIC SERVICES *****
                                                    YYYY-MM-DD
Enabled
                     - Delta Save Facility -
                                                    PDSF002
               -----+
                                                        Allocation Display
         DSF Status ..... Enabled
         Last full save no ... 20
                                  on 1997-01-30 at 11:19:04 |
         Last delta save no .. 5
                                 on 1997-03-03 at 05:06:56 |
         DLOG area size ..... 500
                                  blocks
         DLOG area usage ..... 5%
         DLOG area location .. 6292 (start RABN)
         Device type ..... 3380
                    Press 'Enter' to continue/exit
           -----+
Command ==>
PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8-----PF12-----
Help
              Exit
                                                   Menu
```

In addition to information about the last full save and the last delta save, this display provides information about the current DLOG area size and location, the device type, and the percentage of the DLOG area size currently being used.

Displaying Files Modified by Utilities

Option F, files modified by utilities, indicates the name and number of the files changed on the first line and other information for the file on a second line.

The second line indicates the areas logged (IX for index; DS for Data Storage; AC for address converter) as well as block use and modification statistics for each file:

- total blocks changed in all logged areas;
- total DS/AC blocks used, changed, and the percentage of the used that were changed;
- total index blocks used, changed, and the percentage of the used that were changed.

Another line provides separate totals for the number of DS/AC blocks and index blocks changed for all files listed.

12:55:42	* *	*** A D A B	3 A S BAS	IC SERVIC	CES *	: * * * *	YYYY-MM-DD
DBID 105		PDSFF02					
File No	Logged	Tot Blks	AC/DS	AC/DS Blk	D %	Index	Indx Blks I %
/Name	Areas	Changed	Blks Used	Changed	Log	Blks Used	Changed Log
13 – ADABA	S-LISTING	ł					
IX		1081	281	0	0	1081	1081 100
80 - PRIME	-TIME						
IX		3	2	0	0	3	3 100
	Accumula	ted Totals:	DS/AC	0		Index	1084
PF1 P	F2	PF3 PF	74 PF	'6 PF'	7 – – – –	PF8	-PF12
Help R	epos	Exit				+	Menu

PF2 invokes a window that allows you to reposition the list to a specified file number.

Estimating the Size of a Delta Save Operation

Option S, size estimate for delta, displays the estimated number of changed blocks. This number provides an estimate of the number of database blocks that would be saved in a Delta Save operation at the current time.

Allow a few seconds for the system to perform the calculation. The estimate is not precise: the actual size may be larger or smaller.

***** A D A B A S BASIC SERVICES ***** YYYY-MM-DD 17:05:45 Enabled - Delta Save Facility -PDSF002 -----+ - Estimated Number of Changed Blocks -Fixed number of RABNs to be saved 530 blocks 1084 blocks Index RABNs changed by utilities DS/AC RABNs changed by utilities 0 blocks Number of RABNs logged in DLOG Area .. ca. 2000 blocks Approximately 3600 blocks will be saved with the next SAVE DELTA function. Press 'Enter' to continue/exit -----------+ Command ==> PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8-----PF12-----Help Exit Menu

The fixed area includes the blocks for the first 30 RABNs, all FDTs and all FCBs.

Separate totals are provided for the number of index blocks as opposed to the number Data Storage and address converter blocks changed by utilities.

The calculated number of blocks for the DLOG area is a rounded number.

The total of all blocks to be saved is approximate to the nearest 100.

Disabling Delta Save Logging

Disabling Delta Save logging stops the logging and prevents any further ADASAV SAVE DELTA utility operations.

Option D displays a warning about disabling the Delta Save Facility and asks for confirmation.

```
13:18:20
              ***** A D A B A S BASIC SERVICES *****
                                                          YYYY-MM-DD

                Exit
                                                        Menu
```

Note:

It is not possible to start or restart Delta Save logging with an online function. Delta Save logging is started ("enabled") only after successful completion of a full save operation.

If you confirm, you are returned to the Delta Save Facility main menu and the following message is displayed:

DSF function Disable DSF logging successfully executed.

Once Delta Save logging is disabled, you can either change the DLOG area (see the section Changing the DLOG Area) or logically remove Delta Save logging from the system (see the section Removing Delta Save Logging).

Changing the DLOG Area

You can close the current DLOG area and allocate a new and possibly larger DLOG area elsewhere in the Associator. However, the DLOG area specification can only be changed when Delta Save logging is "disabled".

Option C displays a the following window allowing you to change the values for the DLOG area size and location, and the device type.

13:19:01 ***** A D A B A S BASIC SERVICES ***** YYYY-MM-DD Disabled - Delta Save Facility -PDSF002 ----------+ 13:19:27 Change DLOG area 1997-02-20 DSF Status Disabled Change the values for the following parameters:-DLOG Area Size 500 (in Blocks) DLOG Area Location .. 6292 (1st RABN) optional Device Type 3380 optional | PF1---- PF2---- PF3---- PF4---- PF6---- PF12 Help Exit Menu ------DSF function Disable DSF logging successfully executed Command ==> PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8-----PF12-----Help Exit Menu

In the "Change DLOG Area" window, enter the new DLOG size in blocks and optionally, the starting RABN in the Associator and/or the device type to be used for allocation.

Removing Delta Save Logging

Once Delta Save logging is "disabled", you can logically remove the Delta Save Facility from the system. This means that the DLOG is deallocated and the Delta Save logging status is reset to "not installed".

***** A D A B A S BASIC SERVICES ***** 13:20:36 YYYY-MM-DD Disabled - Delta Save Facility -PDSF002 -----+ - Warning -| When DSF logging is removed, Delta Save operations will no longer be possible. To use DSF again, a completely new install (including a full database save with ADASAV SAVE) must be done. | To confirm the removal of DSF, enter 'CONFIRM' ... _____ +-----+ Code r Database ID .. 105 (ADA-MPM105) Function interrupted with PF-key Command ==> PF1----- PF2----- PF3----- PF6----- PF7----- PF8-----PF12-----Help Exit Menu

Option R displays the following window warning you about removing the Delta Save Facility and asking for confirmation.

If you confirm, your are returned to the Delta Save Facility main menu and the following message is displayed:

DSF004: Delta Save Facility terminated at user's request.
