Messages and Codes

During Entire Net-Work execution, a variety of messages may be issued, usually to the operator console or the print data set. This documentation describes the messages for the Entire Net-Work control programs and line driver modules. The messages are listed alphabetically and the different groups are identified by a section heading.

Messages and Codes issued from Entire Net-Work are described under the following headings:

●	*Message formats*	Describes how you can identify an Entire Net-Work message and its origin.
●	*Response Codes*	Describes Entire Net-Work, Adabas, DCAM and SNA codes.
●	*Entire Net-Work Messages*	Describes the messages that can be issued from Entire Net-Work control programs and the TCPX line driver.
●	*Software AG Internal Transport Subsystem Messages*	Explains the possible internal transport subsystem messages you might receive during its processing.
●	*Abend Codes*	Lists abend (abnormal end) codes that may be returned.
