

# The Entire Net-Work Administration Area

► To access the Entire Net-Work administration area of the System Management Hub (SMH):

Make sure you have started and logged into the System Management Hub.

1. Select the name of the managed host on which Entire Net-Work is installed.
2. Expand the tree-view frame for the managed host by clicking on the plus sign (+) to the left of its name.
3. Select "Entire Net-Work" in the tree-view under the managed host.

The Entire Net-Work administration area of the System Management Hub becomes available to you.

The Entire Net-Work administration area lists the nodes that are managed by Entire Net-Work. You can review this area by selecting Entire Net-Work from the list of managed hosts in the System Management Hub.

Managed Hosts

- host.address.1
  - Administrators
  - Directory Server
  - Entire Net-Work**
  - System Management Hub

|    | Managed node | Description                 |
|----|--------------|-----------------------------|
| V7 | NODE1        | Entire Net-Work Version 7   |
| V5 | NODE2        | Entire Net-Work Version 581 |

Add Managed Net-Work Node

Help

Refresh

The following buttons are available in the command frame of the Entire Net-Work administration area:

**Note:**

You must have "Entire Net-Work" selected in the tree-view frame to see these buttons.

| Button                           | Use this button to:                                                                         |
|----------------------------------|---------------------------------------------------------------------------------------------|
| <b>Add Managed Net-Work Node</b> | Add a new node to be managed by Entire Net-Work.                                            |
| <b>Help</b>                      | Link to help for your use of SMH as it pertains to the Entire Net-Work administration area. |
| <b>Refresh</b>                   | Refresh the screen.                                                                         |
