

Message Format and Severity Levels

Message Format

ATM messages have the general format:

ATM*nnn* *ss* (MESSAGE TEXT) [additional information]

—where

nnn is the message number

ss is the severity code (in hexadecimal)

Some messages have additional information following the message text.

Message Severity Levels

The following table explains the general meaning of each severity level:

| Severity Level | Description |
|----------------|------------------------------------|
| 00 | Software AG use |
| 04 | Information only |
| 08 | Echo and confirmation |
| 10 | Warnings |
| 14 | Operator communication failure |
| 18 | Important shutdown messages |
| 20 | Initialization failure reasons |
| 24 | ABEND notification and information |
| FF | Special, unsuppressable messages |
