

Adabas System Coordinator Installation

This document describes how to install Adabas System Coordinator using installation jobs that are:

- generated by the Software AG System Maintenance Aid (SMA), or
- taken from the job library on the installation tape and manually customized.

In either case, the relevant job numbers (prefixed by the Adabas System Coordinator product code COR) are the same and are referenced at the appropriate step of the installation procedure.

For information about using SMA, refer to the *System Maintenance Aid* documentation.

Note:

The Adabas System Coordinator installation tape contains several files. Always refer to the Report of Tape Creation and Release Notes that accompany the tape for specific information that may modify the general installation procedures described here.
