Overview

This document describes the changes and enhancements provided with Adabas System Coordinator version 7.4.2.

Note:
Adabas System Coordinator was formerly known as System Coordinator for Adabas Options.

Adabas System Coordinator is the required interface for the following Adabas products:

- Adabas Fastpath version 7.4.2

- Adabas Vista version 7.4.2

- Adabas SAF Security version 7.4.2

- Adabas Transaction Manager version 7.4.2 and 7.5.2

Adabas System Coordinator was first introduced as the System Coordinator for Adabas Options version 7.3.1, replacing and extending the common client stub (ADACCS) that was previously delivered with Adabas version 7.1. See the *Version 7.3.1 Release Notes* for information on the differences between ADACCS and Adabas System Coordinator.
