

# Worst Calls... Reports

The six "Worst Calls" reports list and calculate information about the 100 "worst" Adabas calls. Each report rates its commands according to certain criteria:

<b>Worst Calls by ...</b>	<b>Selects the 100 calls that ...</b>
ADADURA	required the most Adabas processing time, and calculates a total for Adabas processing time.
CQDURA	spent the longest time in the command queue, and calculates a total for command queue duration.
DESCUPD	required the most descriptor updates, and calculates the total number of descriptor updates.
IOS	caused the most I/O operations to be performed, and calculates the total number of I/Os.
ISNQ	required the most ISNs, and calculates the total number of ISNs.
TOTDURA	required the longest processing time (i.e., time in the command queue and Adabas processing time) and calculates a total for processing time.
