

# Worst Transactions... Reports

The three "Worst Transactions" reports list and calculate information about the 100 "worst" transactions. Each report rates its transactions according to certain criteria:

<b>Worst Transactions by ...</b>	<b>Selects the 100 transactions that ...</b>
Calls	issued the most Adabas calls.
Duration	required the most Adabas processing time, including time spent in the command queue.
IOS	caused the most I/O operations to be performed.

The number of transactions shown can be varied from 100, by changing the "ENTRIES=" option to any number desired. For example, "ENTRIES=50" displays the 50 worst transactions.
