              - About Adabas SAF Security -                               A19000M1

Welcome to Adabas SAF Security
This Adabas option allows you to integrate Adabas with a central security
repository such as RACF, CA-ACF2 or CA-TopSecret.

ADASAF provides all the safeguards you would expect for:
* Database nuclei                      * Database files
* Database access/update commands     * Adabas utilities
* Console operator commands

In addition ADASAF provides:
* Optional consideration of the originating job as well as user, known as
  Cross-level Checking, allowing differentiation between a SAF user running
  production and that same SAF user running in development
* Protection of transaction data for ET, RE, OP and CL commands
* Storing of Adabas passwords and cipher codes in the security repository
* Adabas Fastpath compatibility and utility sensitivity

Press Enter or any PF Key to continue
