Prerequisites

This section provides an overview of the Adabas Fastpath Version 8.1.2 prerequisites.

- Supported Operating Systems

- Adabas

- Adabas System Coordinator

- Natural

Supported Operating Systems

Adabas Fastpath Version 8.1.2 is compatible with the following operating system environments:

- z/OS

- z/VSE

- BS2000

Adabas

Adabas Fastpath Version 8.1.2 can be used with any supported level of Adabas Version 7.4 or above, or any supported level of Adabas Cluster Services Version 7.4 or above, or any supported level of Adabas Parallel Services Version 7.4 or above. Refer to the Adabas documentation for more information.

Note:
If you are using Adabas Version 8.1.1, the Adabas zap AN811036 must have been applied.

Adabas System Coordinator

Adabas Fastpath Version 8.1 requires that you first install the Adabas System Coordinator Version 8.1. Refer to the Adabas System Coordinator documentation for more information.

Natural

Natural is required by the Online Services application SYSAFP.

Any supported level of Natural Version 4.1 or above can be used. Refer to the Natural documentation for more information.
