

Estimating the Temp Dataset

Option "T" (Temp) displays the Temp Storage menu:

```

08:53:12          ***** A D A B A S  BASIC  SERVICES  *****      2006-07-14
                                - TEMP STORAGE -                                PSPT002

                                Code  Service
                                ----  -
                                I      ADAINV
                                L      ADALOD load/update
                                U      ADALOD delete
                                ?      Help
                                .      Exit
                                ----  -

                                Code ..... _
                                File No. ....: 16
                                Database ID .. 105      (RD-MPM105)

```

The functions on this menu are used to estimate the storage needed on TEMP for the utility function chosen.

```

08:55:02          ***** A D A B A S  BASIC  SERVICES  *****      2006-07-14
                                - TEMP Storage -  ADAINV -                                PSPTI02

File Number ..... 16
Field-Name to be inverted ..
Average descriptor-length ..      ( Default = Field-length)
Max. Number of records ..... 25649      ( Default = TOPISN      )
Device Type ..... 8391
No. of records to delete ...      ( ADALOD Delete only      )
DBID ..... 105      (RD-105)
Password (if required) .....

-----

Required TEMP-Blocks .....
Cylinder ....

PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8----- PF12-----
Help           Exit       Dis Field           Menu

```

PF4 invokes a Field Selection screen.

The TEMP Storage - ADALOD DELETE screen is identical.

The TEMP Storage - ADALOAD LOAD screen differs in that a message is added reminding the user to multiply TOPISN by *all* occurrences of periodic groups and/or multiple value fields:

```
09:01:45          ***** A D A B A S  BASIC  SERVICES  *****      2006-07-14
                                - TEMP Storage -  ADALOD LOAD -              PSPTI02

File Number ..... 16
Field-Name to be inverted ..
Average descriptor-length ..      ( Default = Field-length)
Max. Number of records ..... 25649      ( Default = TOPISN      )
  Make sure to multiply TOPISN by ALL occurrences of PE and/or MU
```
