

Uninstalling Adabas Manager

This chapter describes how to uninstall Adabas Manager in a Windows environment.

Notes:

1. Uninstalling will not remove any files that were not originally installed by the Adabas Manager installation tool. For example, files modified, expanded, moved, or introduced after installation must be removed manually.
2. Uninstalling will stop Adabas Manager.

To uninstall Adabas Manager on Windows:

1. Go to Start/Settings/Control Panel.
2. Select **Add/Remove Programs**.
3. Select **Software AG Adabas Manager 7.5.1** and click on the **Change/Remove** button.

The InstallShield Wizard is invoked.

4. Select Remove on the Welcome panel and click **Next**. Click **OK** for any verification messages.

The Setup Status panel appears on which you can watch the progress of the uninstallation.

5. When the uninstallation has completed, the Finish panel appears. Click **Finish** to end the uninstallation.

Alternatively, when you try to install this version of the product, the InstallShield automatically detects whether another version is already installed and prompts you to remove it.
