

# Accessing the Adabas Manager Area

Logging in to Adabas Manager involves first logging in to System Management Hub, then logging in to a particular host, and then selecting the Adabas Manager application.

## To access the Adabas Manager area of SMH:

1. During installation, an entry for Adabas Manager has been created in your Start Menu. Select **Software AG Adabas Manager 7.5.1 -> Administration** from your program list.

The logon screen for the System Management Hub (SMH) appears.

2. Logon to the System Management Hub...

The System Management Hub main panel appears.

3. Select the name of the managed host on which Adabas Manager is installed.
4. Expand the tree-view frame for the managed host by clicking on the plus sign (+) to the left of its name.
5. Expand the tree-view for Adabas Manager.

## To enter your Adabas Manager license file:

1. Select Adabas Manager in tree-view.

The Adabas Manager **Welcome** panel is displayed in detail-view.

2. Click on the **License** button at the bottom of the page.

The **License Files** panel is displayed in detail-view.

3. Click on the **Modify** button below the table or **Cancel** to return to the **Welcome** panel.

The table in detail-view now allows you to either enter the path for your Adabas Manager license file or browse to the location of the file.

4. Click **OK** or **Cancel** to return to the **Welcome** panel.

### **Note:**

The Adabas Manager Documentation has been installed with the product. You can either view it by selecting **Software AG Adabas Manager 7.5.1 -> Documentation -> Overview** from your program list, or call up the appropriate page by clicking on the **Help** button () in the top right corner of your Adabas Manager panel.
