---

### ERROR-121 Missing function parameter

**Action** Add one of the following parameters and rerun the job:

- ADADEF DEFINE - define a new database
- ADADEF NEWWORK - define a new work

### ERROR-122 Invalid value for the parameter DBID

**Explanation** The value for the database ID must be in the range 1 to 65,535.

**Action** Supply the correct parameter value and rerun the job.

### ERROR-123 Checkpoint-file definition missing in parameter-list

**Explanation** Each Adabas database requires a checkpoint file.

**Action** Add the following parameter and rerun the job.

```
ADADEF FILE=xx,CHECKPOINT, ...
```

### ERROR-124 Multiple system file definition not permitted

**Explanation** The Adabas checkpoint and security file can be defined only once per database.

**Action** Supply the correct parameter value and rerun the job.

### ERROR-125 Invalid value for the parameter WORKSIZE

**Explanation** The value of the WORKSIZE parameter must be at least 300 + WALT + number of blocks per track.

**Action** Increase the WORKSIZE value and rerun the job.

**ERROR-126 ADADEF not permitted to run**

- Explanation** An attempt was made to run ADADEF in parallel with an active nucleus. The Adabas nucleus returned response "response-code". (A short explanation is given here).
- Action** The only acceptable response code is 148. Shut down the nucleus and rerun the job.

**ERROR-127 Inconsistent parameter list**

- Explanation** A corresponding extent parameter is required for  
ASSOSIZE/ASSODEV/AALT, and DATASIZE/DATADEV/DALT.
- Action** Supply the correct parameter value and rerun the job.

**ERROR-128 File type missing or invalid**

- Explanation** The file number must be followed by a keyword defining the type of the system file to be loaded.
- Action** See the Adabas Utilities documentation for further information. Supply the correct parameter value and rerun the job.

**ERROR-129 DSST-extent space allocation failed**

- Explanation** Not enough free Associator space is available to allocate a DSST extent.
- Action** Supply a larger Associator extent and rerun the job.

**ERROR-130 Invalid value for MAXDS/MAXNI/MAXUI**

- Explanation** The value for the mentioned parameters must be specified in blocks and must be in the range 1B to 65535B.
- Action** Specify the correct parameter value and rerun the job.

**ERROR-132 Database not formatted**

- Explanation** The supplied ASSO contains valid GCBs.
- Action** Run ADAFRM before running ADADEF, or specify the OVERWRITE parameter in the ADADEF job.

**ERROR-133 Invalid size specification**

**Explanation** The (ASSOSIZE / DATASIZE / WORKSIZE) parameter value specified for (DDASSO / ASSOR1/2, DDDATA / DATARn, or DDWORK / WORKR1) is greater than the space physically available (an actual parameter / job control value is printed with the message text).

**Action** Supply the correct parameter value, and rerun the job.

**ERROR-134 No database to be overwritten**

**Explanation** The parameter OVERWRITE was specified, but the data sets assigned do not contain a database.

**Action** Remove the OVERWRITE parameter, and rerun the ADADEF job.

**ERROR-135 Value of parameter MAXRECL too large**

**Explanation** The MAXRECL value is either

- greater than the default value "def-value"; or
- less than 7.

**Action** Supply the correct MAXRECL parameter value, and rerun the ADADEF job.

**ERROR-136 Invalid value for the parameter RABNSIZE**

**Explanation** Either 3 or 4 may be specified for the RABNSIZE parameter.

**Action** Correct the value specified for the RABNSIZE parameter and rerun the ADADEF job.

**ERROR-137 Dataset size too large**

**Explanation** The DATA/ASSO/WORK data set SIZE parameter value exceeds the maximum "nnnn" blocks.

**Action** Correct the value specified for the specified data set SIZE parameter and rerun the ADADEF job.

**ERROR-138 Cannot set UES=NO while file *file-number* loaded**

**Explanation** The specified file contains at least one element such as a wide-character formatted field that require the database to be enabled for universal encoding; that is, UES=YES is required.

**Action** Reexamine your need to set UES=NO and adjust the file accordingly.

**ERROR-139 Specify UES=NO to disable UES**

**Explanation** It is not possible to turn UES off by setting all xxCODE parameters to 0. ADADEF does not differentiate between a parameter set to zero (0) and a parameter not specified.

**Action** To disable UES, set the UES parameter equal to NO.
