ASSOPRINT: Print/Dump Associator Blocks

```
ADAICK   ASSOPRINT   RABN = { rabn | rabn-rabn }
                      [NOUSERABEND]
```

This chapter describes the syntax and parameters of the ASSOPRINT function.

- Essential Parameter

- Optional Parameter

Essential Parameter

RABN: RABNs to be Processed

The RABN (or a single range of RABNs) to be printed/dumped. If ADAICK can determine the type of information stored in the block (for example. UI, NI,...), it produces a formatted printout.

Optional Parameter

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
