

# DUMP: Activate Dump Print Format

```
ADAICK DUMP [NOUSERABEND]
```

This function requests that blocks be printed in dump format. See the NODUMP function for information about suppressing dump format printing. This function should only be used in conjunction with the ASSOPRINT, DATAPRINT, FCBPRINT, FDTPRINT, GCBPRINT, and PPTPRINT functions.

If both the INT and DUMP functions are specified, blocks are printed in both formats.

---

## Optional Parameter

### **NOUSERABEND: Termination without Abend**

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
