

NIPRINT: Print/Dump Normal Index

Use the NIPRINT function to print and dump the normal index.

```
ADAICK NIPRINT FILE = file-number  
[NOUSERABEND]
```

Essential Parameter

FILE: File Number

The number of the file for which the normal index is to be printed/dumped. A file number is required the first time you execute ADAICK.

If FILE is omitted on subsequent executions, the last file accessed by ADAICK is used.

Optional Parameter

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
