UIPRINT: Print/Dump Upper Index

Use the UIPRINT function to print and dump the upper index.

```
ADAICK   UIPRINT   FILE = file-number
                   [NOUSERABEND]
```

This chapter covers the following topics:

- Essential Parameter

- Optional Parameters

Essential Parameter

FILE: File Number

> The number of the file for which the upper index(es) is/are to be printed/dumped. A file number is required the first time you execute ADAICK.

> If FILE is omitted on subsequent executions, the last file accessed by ADAICK is used.

Optional Parameters

NOUSERABEND: Termination without Abend

> When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump).

> If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
