ADALOD Space/Statistics Report

During LOAD or UPDATE operation, ADALOD prints a report on the message output data set (DDDRUCK for z/OS and z/VM systems, SYS009 for VSE systems, or SYSOUT for BS2000). The report shows the following information:

- ADALOD function executed (LOAD or UPDATE), and the database/file affected;

- Estimated NI/UI sizes (shown for the LOAD function only if the NI/UISIZE parameters were not specified);

- Available and used file space, by Adabas component (shown for the LOAD function only);

- Current RABNs assigned for the file (shown for the LOAD function only);

- For spanned record files, the number INPUT RECORDS PROCESSED includes all physical record segments;

- File processing statistics (records processed and system storage used).

Example of the ADALOD LOAD report:

```
  PARAMETERS:ADALOD  LOAD FILE...
        .
        .

  FUNCTION TO BE EXECUTED:

LOAD FILE NUMBER   7  (MYOWNFILE)
INTO DATABASE    0013  (MYBESTDB)

AVAILABLE SPACE:

(LOAD function only)
