```

Welcome to Adabas SAF Security

This Adabas option allows you to integrate Adabas with a central security repository such as RACF, CA-ACF2 or CA-TopSecret.

ADASAF provides all the safeguards you would expect for:

- \* Database nuclei
- \* Database files
- \* Database access/update commands
- \* Adabas utilities
- \* Console operator commands

In addition ADASAF provides:

- \* Optional consideration of the originating job as well as user, known as Cross-level Checking, allowing differentiation between a SAF user running production and that same SAF user running in development
- \* Protection of transaction data for ET, RE, OP and CL commands
- \* Storing of Adabas passwords and cipher codes in the security repository
- \* Adabas Fastpath compatibility and utility sensitivity
