

About this Documentation

This document addresses administrators responsible for configuring and running Adabas Delta Save Facility once the product is installed.

This document is organized as follows:

●	<i>Overview</i>	Provides an overview of Delta Save Facility administration.
●	<i>ADARUN Parameter DSF</i>	Describes the use of the DSF parameter of ADARUN with respect to the Delta Save Facility.
●	<i>ADARUN Parameter DSFEX1</i>	Describes the use of the DSFEX1 parameter of ADARUN with respect to the Delta Save Facility.
●	<i>Special Online Functions</i>	Describes the special online functions of the Delta Save Facility available through the Adabas Online System.
●	<i>Calculating the DLOG Area Size</i>	Describes how to calculate the Delta Save Facility logging (DLOG) area size.
●	<i>Calculating the DSIM Data Set Size</i>	Describes how to calculate the Delta Save Images (DSIM) data set size for the Delta Save Facility.
