

ADARES JCL/JCS Requirements and Examples

This section describes the job control information required to run the Delta Save functions of ADARES with BS2000/OSD, z/OS, z/VM, VSE/ESA and z/VSEsystems, and shows examples of each of the job streams.

Note:

When running with the optional Recovery Aid (RLOG), all temporary datasets must also be cataloged in the job control.

This chapter covers the following topics:

- BS2000/OSD
 - z/OS
 - z/VM
 - VSE/ESA and z/VSE
-
