

Add a New Extent to the Associator or Data Storage

Option "A" is used to add a preformatted data set to the Associator or Data Storage. Before using this option, the data set to be added must be formatted using the ADAFRM utility.

Option "A" should be used only if the new data set is located on a different physical device. The Associator and Data Storage can each have as many as five data sets.

```

09:34:21          ***** A D A B A S  BASIC SERVICES *****      2006-07-20
DBID 105                -  Add Dataset  -                          PDMA002

Enter Parameters to Add either a DATA OR ASSO dataset:

      ASSO Device ..... _____
      ASSO Size ..... _____

      DATA Device ..... _____
      DATA Size ..... _____

      Blocks/Cylinders .. B

```

This function corresponds to the utility function ADADBS ADD.

The equivalent direct commands are

```
ADD ASSO
```

```
ADD DATA
```
