

Database Report

Options on the Database Report menu provide information only: none of the displayed information can be changed. However, direct commands can be entered on this menu to invoke other Basic Services functions for making changes.

Database Report functions provide both general and specific information in either table or report format. They correspond to selected functions of the Adabas ADAREP utility.

                   - Database Report -                               PDR0002

                Code      Service
                ----      -
                C          List files with crit. no. of extents
                D          Display field description table (FDT)
                F          Display file(s)
                G          General Database layout
                L          List VOLSER distribution of Database
                R          Display ASSO/DATA block (RABN)
                U          Display unused storage
                ?          Help
                .          Exit
                ----      -

Code ..... _
File No ..... _____ Password ..
Database ID .. 105      (RD-MPM105)
VOLSER ..... _____

Command ==>
PF1----- PF2----- PF3----- PF4----- PF6----- PF7----- PF8----- PF12-----
Help              Exit                               Menu

```

Options allow you to view database-level general information and tables of database files, files whose extents are at or near the allowable maximum, file-specific information for any file, physical database distribution by volume/serial number (VOLSER), and available space that is not currently being used. Additional displays are available using direct commands.

The Adabas Online System Database Report documentation is organized in the following topics:

	Code	Function
●	C	<i>Displaying Files with Critical Number of Extents</i> shows a list of the files that have a critical number of extents.
●	D	<i>Display Field Definition Table (FDT)</i> shows the field definition table (FDT) and special descriptor table (SDT) for the specified file.
●	F	<i>Display Files</i> shows file(s), either a list of all files in the specified database or detailed information about a specific file.
●	G	<i>Display General Database Layout</i> shows the general layout of the specified database.
●	L	<i>Display Volume/Serial Numbers for Database</i> shows the volume/serial number layout of the specified database.
●	R	<i>Display RABNs</i> shows Associator / Data Storage blocks (RABNs).
●	U	<i>Display Unused Storage</i> shows unused storage.
●	--	shows other information by using direct commands.
