

Adabas Manager Configuration

The Adabas Manager **Configuration** panel allows you to enter your license key for the Adabas Manager Enterprise Edition; you also have to update your registry for Adabas Event Replicator Administration and to use Predict Access Component in the **Configuration** panel.

► To view the Adabas Manager Configuration panel:

1. Select **Adabas Manager 7.6.3** in tree-view and right-click on it.
2. Select **Configuration** in the menu.

The Adabas Manager **Configuration** panel is displayed.

The screenshot shows the 'Adabas Manager Configuration' window. It has a title bar with a question mark icon. The main area is divided into several sections:

- Mainframe License:** A text field is empty. Below it is a 'Display' button.
- Path to License File:** A text field contains the path 'C:\Program Files\Comexion Files\Software AG\License\12ANA75w2003ew2003av2003cSunOS.xml'. Below it is a 'Modify' button.
- Predict Access:** A table with two columns. The first column has 'FDIC DBID' and 'FDIC PNR'. The second column has values '122' and '34'. Below the table is a 'Modify' button.
- Natural Runtime:** A table with two columns. The first column has 'PMAT DBID' and 'PMAT PNR'. The second column has values '299' and '11'. Below the table is a 'Modify' button.
- Natural Bin Directory:** A text field contains the path 'C:\program files\Software AG\natural\6.3\bin'. Below it is a 'Modify' button.

► To enter your Adabas Manager license key file:

1. Display the Adabas Manager **Configuration** panel.

The current license file name is displayed. If the license key field is empty, no license file is active and Adabas Manager is running in Standard Edition mode.

Note:

Click on the **Display** button in the **Configuration** panel to view a current license file text.

2. Click on the **Modify** button to browse to the new license file and to activate it.
3. After selecting the new license key file click **OK** to activate it or **Cancel** to return to the **Configuration** panel.

▶ **To update your registry for Event Replicator Administration and to use Predict Access Component:**

1. Display the Adabas Manager **Configuration** panel.

Note:

If Event Replicator Administration and/or Predict Access Component are not installed on your system, those sections of the panel relating to Event Replicator Administration and/or Predict Access Component will not be displayed.

2. Press the **Modify** buttons and enter the required values:
 - the ID of the database containing the Predict repository (DBID) and the file number of the FDIC file;
 - the Natural Runtime parameters (DBID and file number of the FNAT containing the Predict Access Component);
 - the Natural Bin Directory.
