

Stopping a Database

▶ **To stop an Adabas database:**

1. Select an Adabas database in tree-view.
2. Right-click on the database name in tree-view.
3. Select **Stop Database** on the drop-down menu.

The session termination selection is displayed in detail-view. You have the following choices:

- Normal session termination (ADAEND)
 - Cancel session immediately (CANCEL)
 - Stop session (HALT)
4. Choose how you want to stop the database by clicking in the appropriate check box for the user until a check mark appears and click **OK** to confirm.

Or:

Click on the **Cancel** button to continue working with this database.
