

Listing Managed Nodes

▶ To list the nodes managed by Entire Net-Work:

Make sure you have accessed the System Management Hub.

- Select Entire Net-Work from the list of managed hosts.

The lists of managed nodes appears in the detail-view frame and are listed under the expanded Entire Net-Work host name.

The screenshot shows the System Management Hub interface. On the left is a tree view of managed hosts. The 'Entire Net-Work' folder is expanded, showing two nodes: 'V7 NODE1' and 'V5 NODE2'. Below the tree view is a menu with three options: 'Add Managed Net-Work Node', 'Help', and 'Refresh'. On the right is a table with two columns: 'Managed node' and 'Description'. The table contains two rows: one for 'V7 NODE1' with description 'Entire Net-Work Version 7', and one for 'V5 NODE2' with description 'Entire Net-Work Version 5'.

	Managed node ⇅	Description ⇅
V7	NODE1	Entire Net-Work Version 7
V5	NODE2	Entire Net-Work Version 5

The status of each node is indicated by the icon to the left of the managed node name.

Icon	Description
?	The defined node cannot be reached by SMH.
V5	The Entire Net-Work 5 node is active and available for management by SMH.
V7	The Entire Net-Work 7 node is active and available for management by SMH.
