

# GCBPRINT: Print/Dump General Control Blocks (GCBs)

```
ADAICK GCBPRINT [NOUSERABEND]
```

**Note:**

The NOOPEN parameter can be specified for this function, but is ignored by Adabas.

Use the GCBPRINT function to print and dump the general control blocks (GCBs).

---

## Optional Parameter

**NOUSERABEND: Termination without Abend**

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump). When NOUSERABEND is specified, it must be specified as the first parameter (before all other parameters) for the utility function.

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
