

NODUMP: Suppress Dump Print Format

This function suppresses the dump print format produced, by default, for ADAICK dumps. See the DUMP function for information about dump print format. This function should only be used in conjunction with the ASSOPRINT, DATAPRINT, FCBPRINT, FDTPRINT, GCBPRINT, and PPTPRINT functions.

```
ADAICK NODUMP [NOUSERABEND]
```

Note:

The NOOPEN parameter can be specified for this function, but is ignored by Adabas.

Optional Parameter

NOUSERABEND: Termination without Abend

When an error is encountered while the function is running, the utility prints an error message and terminates with user abend 34 (with a dump) or user abend 35 (without a dump). When NOUSERABEND is specified, it must be specified as the first parameter (before all other parameters) for the utility function.

If NOUSERABEND is specified, the utility will *not* abend after printing the error message. Instead, the message "utility TERMINATED DUE TO ERROR CONDITION" is displayed and the utility terminates with condition code 20.
